

**Molding and Casting, Silk Screen Printing Area  
5.2 meters X 2.5 meters**

Basic counter space is 1 meter X 5 meters, metal surface for easy clean-up and includes:

- One large sink with hot and cold 110V if US, 220V if outside of US
- Air ventilation to outside for fumes

Under Counter is open shelving for storage of heavy transformers, heavy molding & casting materials, paints, cups, stirrers, silk screens, etc.

Maybe put a few high stools here as well for sitting while working.
